

Water Treatment

PS.D4 Housing Probe Holder

The PS.D4 probe holder series is an advanced housing for by-pass hydraulic connection. Once installed, the electrode will remain in contact with the fluid all the times, allowing the most accurate readings possible. There are four different versions to satisfy all needs.

Technical Characteristics:

Housing probe holder for three probes
Pressure up to 5 bar
Temperature up to 40°C
Black glass
pH range: 2.7÷12 Ph

Field Application:

- Waste Water
- Drinking Water
- Cooling Towers
- Reverse Osmosis
- Irrigation
- Swimming Pool

Features

- Inlet/Outlet: 8x12 mm (tube)
- Probe connection: PG 13.5mm
- Head Material: PP Black
- Glass Material: PP Black
- Pressure range: 5 bar at 50°C
- Feedback Flow check sensor by Reed at 0.5 bar minimum pressure.
- pH range chemical compatibility: 2.7÷12 pH black body

Probes Models:

pH and Redox: 12 mm
pH and Redox: 13.5 mm
Temperature: 12 or 13.5 mm
Conductivity: 12 or 13.5 mm
Oxygen: 13.5 mm
